Budding software engineer born and raised in Washington DC, who is a determined and curious learner, and an absolute 3d printing fanatic. As a public relations and graphic design professional, I relied on my research, strategy, and a keen eye for detail to solve problems. I will use my same fanaticism for 3d printing and pour it into programming your web application! I have a unique ability to visualize and sort data into visually appealing and simple inputs for users. My experience includes bringing a brand to life through intuitive design, and exceeding growth expectations.
